PROFESSIONAL SUMMARY

Statistics graduate with professional experience reviewing data and business records for inconsistencies, investigating discrepancies, and documenting quality findings. Combines Python, SQL/PostgreSQL and Excel skills with hands-on API and database troubleshooting through ArtistLead, an independently developed artist-data application. Applies structured reasoning, evidence checks and clear written feedback to analytical and AI evaluation tasks.

CORE SKILLS

AI evaluation and quality: AI response rating, data labelling, instruction following, rubric interpretation, factual verification, error categorization, written rationales

Data and analysis: Data validation, discrepancy investigation, Python, SQL, PostgreSQL, Excel, CSV/JSON

Technical workflows: REST API inspection, troubleshooting, documentation, Next.js, TypeScript

PROFESSIONAL EXPERIENCE

Data Analyst | Deagmark LLC (Remote) | 2022–2025

- Reviewed datasets and business records for missing values, contradictory entries and inconsistent information; documented findings for follow-up.
- Cross-checked source information to investigate discrepancies and support reliable internal reporting and decision-making.
- Prepared clear written descriptions of issues and corrective observations for stakeholder review.

AI EVALUATION AND PROJECT EXPERIENCE

Turing — AI Evaluation Experience

- Rated AI-generated responses and labelled data
- Applied task guidelines to review response quality.

AI Response Evaluation and Quality Review | Independent Practice | 2026

- Reviewed practice AI responses against task instructions, available factual evidence, completeness, clarity and relevance; recorded rationale for quality judgments.
- Identified unsupported statements, missed constraints and reasoning errors; proposed precise corrections.

ArtistLead | Independent Developer | 2026–Present

- Built and tested Spotify artist-search and record-retrieval workflows using Next.js, TypeScript, REST APIs and Neon PostgreSQL.
- Investigated duplicate or incomplete records, API failures and database behavior; documented reproducible issues and fixes.
- Worked with persisted artist data and search activity to improve consistency of application records.

EDUCATION AND TRAINING

BSc Statistics | Kwara State University | 2020

Certified Python Programming | Speta Business and Skills Academy
